K 69

Recommended for publication by the Scientific Council of the National University of Life and Environmental Sciences of Ukraine (protocol №4 from 23.11.2022)

Reviewers:
V. Postoenko – Doctor of Agrcultural Sciences, Professor;
L. Biliavska – Doctor of Biological Sciences, Senior Researcher;
V. Tesliuk – Doctor of Agrcultural Sciences, Professor;
L. Klymenko – Senior teacher, Department of English Philology of Humanities – Pedagogical Faculty NUBiP Ukraine

Yu. Kolomiiets, O. Klyachenko, O Subin
Biotechnology. – K.: Comprint, 2022. – 420 p.

ISBN

The textbook outlines the most informative methods and techniques of biotechnological work with cultivated plants. Methods of introduction into culture in vitro, microclonal propagation, obtaining callus cultures, regeneration and adaptation in vivo of plants and modern technological genetic engineering approaches are presented. The definition and interpretation of the most commonly used terminology in biotechnology are given.

For students of biotechnological specialties, scientists, teachers, graduate students, specialists specializing in biotechnology, selective breeding, cell biology, genetics and plant physiology.

CONTENS

Foreword…….…… 5
Chapter 1. Biotechnology: theory and practice ……... 12
1.1. The main directions of the development of biotechnology ……... 12
1.2. Tasks of biotechnology …….. 17
Control questions ..……... 22
Chapter 2. Main characteristics of biotechnology facilities ……..... 23
2.1. Mycoplasmas …… 25
2.2. Viruses ……... 25
2.3. Bacteria …….. 30
2.4. Algae …….. 41
2.5. Lichens ……... 50
2.6. Fungus …… 52
2.7. Aquatic plants …… 56
2.8. Higher plants *in vivo* and *in vitro* …….. 57
2.9. Animals in vivo and in vitro …….. 60
Control questions …….. 62
Chapter 3. Main principles of biological regulation 63
3.1. The main elements contained in living organisms ……. 63
3.2. Carbohydrates …… 69
3.3. Lipids ……..... 77
3.4. Amino acids ……... 80
3.5. Proteins …….. 84
3.6. Nucleic acids …….. 90
3.7. Enzymes-biocatalysts ……. 96
Control questions …….. 97
Chapter 4. Cell and tissue engineering of plants ……. 99
4.1.Biology of cultured cells and tissues …….. 100
4.2. Culture of callus tissues ……. 110
4.3. Clonal micropropagation and plant improvement ……. 123
4.4. Culture of isolated cells and tissues in plant breeding ……... 138
4.5. Biotechnology of obtaining bioactive compaunds of plant origin ……. 149
4.6. Hybridization of somatic cells. selection, cultivation and fusion of isolated protoplasts ……. 150
4.7. Cellular selection and somaclonal variability. Somatic and haploid hybridization ……. 153
4.8. Clonal micropropagation of plants …… 155
4.9. BAC of plant origin …… 156
4.10 Biotechnologies of obtaining BAR of plant origin …….. 163
Control questions …….. 169

Chapter 5. Genetic engineering…….. 171
5.1. Molecular basis of genetic engineering ……. 172
5.2. The main stages of transgenic organism creation …….. 193
5.3. Genetic engineering of plants …… 195
5.4. Genetic engineering of animals ……. 212
5.5. Gene-based diagnostics and human gene therapy ……. 221
Control questions …….. 226
Chapter 6. Collections and cryobanks of cell cultures……. 228
6.1. Preservation of organisms and cell cultures …….. 228
6.2. Cryopreservation and its basics ……. 231
6.3. Cryobanks …….. 239
Control questions …….. 240
Chapter 7. Ecological biotechnology…….. 241
7.1. Biotechnology of solid waste utilization ……... 244
7.2. Biotechnology of wastewater treatment …… 248
7.3. Bio-purification of gas-air emissions ……..... 257
7.4. Biogeotechnology and metal extraction …… 264
7.5. Bioenergetics ……. 272
7.6. Bioconvertible complexes using integrated biotechnological processes ….. 282
7.7. Biodegradation of biomass by microorganisms ……. 295
7.8. Xenobiotics and their biodegradation …… 332
7.9. Bioremediation …….. 337
Control questions …….. 340
Chapter 8. Nanobiotechnology……... 342
8.1. Perception of nanotechnology ……... 342
8.2. Nanotechnology in medicine and biology……..... 344
8.3. The main directions of nanobiotechnology development …….. 351
8.4. Possible risks associated with the use of nanobiotechnology 352
Control questions …….. 354
Chapter 9. Biosafety and state control ……. 355
9.1. Classes of risks …….. 355
9.2. The international legislative framework on biosafety and its implementation ……..... 364
9.3. Legislative base of Ukraine on biosafety and its implementation ……. 366
Control questions …….. 372
Historical milestones in the development of biotechnology ……. 373
Glossary of key terms ……... 412
Literature ……... 424
