

REVIEW

*to the educational program "International Economics",
specialty 051 "Economics" field of knowledge 05 "Social and behavioral Sciences,"
of the first-cycle (bachelor's) level of higher education
National University of Life and Environmental Sciences of Ukraine*

The peer-reviewed educational program "International Economics" of the first-cycle (bachelor's) level of higher education demonstrates a high level of professional training that aligns with contemporary trends in global economic development and the challenges of globalization. The program has a comprehensive structure, incorporating fundamental courses in economic theory, international finance, trade, management, and marketing. Particular emphasis is placed on the development of students' analytical thinking, reflected in educational components such as econometrics, market analysis, economic analysis, and risk assessment. A distinctive feature of the program is its practical orientation. The curriculum includes internships in international companies and organizations, enabling students to apply acquired knowledge in practice and prepare for real-world challenges in their professional careers.

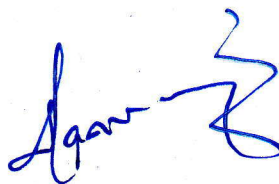

The program meets educational and qualification requirements and adheres to international standards for training professionals in the field of economics. The integration of interactive teaching methods, such as business cases, project-based learning, and simulations, fosters the development of students' practical skills.

Program integrates economics, finance, management, analytics, and foreign languages, providing a comprehensive foundation for future career development. The delivery of selected components in English equips students with the necessary competencies to operate effectively in an international environment.

It is also advisable to consider the possibility of incorporating the courses "Modeling international markets use neural networks" and "Fundamentals of artificial intelligence in economics" into the curriculum.

The educational program "International Economics" of the first-cycle (bachelor's) level of higher education addresses the current challenges of professional training. Its labor market orientation, practical focus, and interdisciplinary approach contribute to the preparation of specialists capable of working effectively in the international economic environment. The program is recommended for practical implementation in the educational process.
